

FOR IMMEDIATE RELEASE

Solo Boater Builds FloatPlanWizard to Make Float Plans Easier and More Accessible to Recreational Boaters

Originally released June 7, 2026 | Updated August 20, 2026

A solo boater's personal safety need grew into a recreational-boating platform with free membership, optional Premium trips, and expanding public planning and safety resources.

GULF HARBORS, Fla. - June 7, 2026 (updated August 20, 2026)

FloatPlanWizard.com, a boating trip-planning and float-plan platform created by Gulf Harbors resident Larry Wald, launched to help recreational boaters prepare trips, send float plans, and share useful information with trusted contacts.

Wald is a longtime recreational and solo boater with approximately 55 years on the water. He first built the concept because, when boating alone, he wanted a quick and practical way to tell his family or shore contact where he planned to go and provide useful information if he failed to return. FloatPlanWizard grew from that personal safety need into a broader recreational-boating planning and safety platform. Wald is also a retired professional web developer with approximately 30 years of professional web-development experience.

"Boating safety tools only help if people actually use them. I wanted a faster way to prepare and share a float plan without recreating the same information for every trip. FloatPlanWizard is built to give everyday boaters an easy way to plan a trip, share important details, and keep trusted contacts informed."

- Larry Wald, Founder

Free Membership with Optional Premium Trips

FloatPlanWizard is designed to reduce the time and repetitive effort involved in creating, sharing, and monitoring a float plan. Membership is free, including full trip planning and Basic float-plan sending. Every new member receives one complimentary Premium Send Credit for one complete Premium trip. The credit is used on the first successful Premium Save & Send.

Free members can save vessel, operator, passenger, shore-contact, waypoint, and trip information and maintain multiple Draft float plans.

After the complimentary credit is used, additional Premium trips can be purchased individually for \$4.99, through Monthly Premium for \$9.99/month, or through Annual Premium for \$89/year. Individual Premium trip access currently lasts up to 21 days.

Premium trips add **Active Cruise tools, Premium trip monitoring, and a private Trip page that can be shared with family and shore contacts so they can follow trip status and progress.** Route planning and Basic float-plan sending remain free.

New Free Public Boating Resources

Since the original June launch, FloatPlanWizard has expanded its free public resources with a [Solo Boating Safety Guide](#), a [Shore Contact / Overdue Boater Guide](#), a [Boat Fuel Calculator](#), and Great Loop planning libraries that include public [lock information](#). These resources extend the platform's safety and trip-planning mission beyond registered members.

Safety Notice

FloatPlanWizard is not an emergency dispatch, rescue, or distress-response service. In an emergency, boaters should use official emergency channels such as VHF Channel 16, DSC distress, 911, EPIRB/PLB, flares, or other accepted emergency methods.

About FloatPlanWizard

FloatPlanWizard.com is a recreational-boating trip-planning and float-plan platform built by a solo boater. Free membership includes route planning, saved boating and trip information, multiple Draft float plans, and Basic float-plan sending. Optional Premium trips add operational, monitoring, delivery, and sharing features, while public guides and planning tools remain available without an account.
